

REASON TO RIDE

SMARTMOTION
PACER

SMARTMOTION
electric bikes

INNOVATIONS

Integrated color LCD

The Pacer integrates a large full colour LCD display with USB port into the frame. This keeps your bike clutter free and crash proof.

Available colours

- Orange | Black | Gray
- White | Black | Gray

Integrated Battery

Smartmotion's new 36 volt integrated battery keeps weight low and central for the best ride.

10 Speed Drive

A 10 speed Shimano drive train combined with a light weight 300 watt hub motor means you can climb to the summit and race back home.

Torque Sensor

The Pacer measures your pedal pressure and multiplies your input to give a smooth super human ride.

LIGHTSAVER system

"See where you are going as well as being seen".

Smartmotion introduces Lightsaver system. Designed so you will be seen on the road. Dual high visibility LED strips on the rear carrier and an under frame LED strip that lights your path and makes your stand out. This combined with a super bright front light make the Pacer the brightest bike on the market.

Front integrated flood strip. Rear integrated LED strips. Front ROXIM LED:
-210° wide beam
-900 lumen
-80 metre throw

SMARTMOTION PACER

START RIDING AGAIN

Designed for commuting, touring or your daily get about. Lightsaver system incorporated and other great features like high capacity rear carrier, USB charging, chain guard and kick stand.

SMARTMOTION PACER

Available colours

-  Orange | Black | Gray
-  White | Black | Gray
